

## Description

## Technical Specs

Stainless Steel 06B15 sprockets are made from a high-quality 304-grade stainless steel that offers superior resistance to wear and corrosion. 06B15SS sprockets are manufactured in accordance to British Standards (BS), DIN, and ISO specifications so they interchange with other manufactures and runs 06B stainless steel roller chain perfectly. Commonly 06B15 stainless steel sprockets are located in corrosive, and or food-grade applications. Besides the 15-tooth sprocket we also stock 06B stainless steel roller chain, stainless steel bearings, stainless steel electric motors and reducers, and stainless steel metric shafting. For more information or to get a quote please contact us and we will be happy to assist you.

## 06B15 Stainless Steel Sprocket Dimensions

- sprocket Size: 06B15SS
- Tooth Count: 15
- Dimension (O): 45.81mm
- Dimension (K): 49.3mm
- Dimension (N): 34mm
- Dimension (D): 10mm
- Dimension (B): 22mm
- Dimension (L): 25mm
- Sprocket Weight: 0.18 kG

These sprockets are typically in-stock with a standard stock bore (plain bore) configuration. But what separates USA Roller Chain and Sprockets from other stainless-steel sprocket
